**Re: Posey Solar Development Site Plan Modifications**

Dear Mr. Gerking:

At Tenaska's request, Westwood Professional Services (Westwood) has compiled a summary of the material changes made in the most recent revision of the Posey Solar Development Site Plans. The summary below lists the changes between RevG dated 08/25/2021 and RevN dated 05/19/2022. This is a high level review and does not include minor design or formatting modifications.

- Array Removals From:
  - Areas no longer proposed for development
  - Wetlands reclassified as USACE jurisdictional
- Array Expansions Into:
  - Wetlands reclassified as non-jurisdictional wetlands
  - FEMA floodplains
  - Areas previously used for project collector substation, switchyard, operations & maintenance (O&M) building, and overhead transmission line
  - See Attachment A for summary of regions containing array modifications.
- Identification of proposed met stations co-located with proposed inverters
- Identification of 300' non-participating residence setback
- Relocation of substation, switchyard, and operations & maintenance (O&M) building
  - Removal of overhead power line between substation and switchyard
- Removal of alternate substation and O&M building
- Addition of a temporary laydown yard
- Addition of alternate medium-voltage alternating current (MVAC) cable collection corridors
- Addition of vegetative screening at the Project collector substation.
- Addition of substation screening detail and alternate array screening details to the Plant Schedule.

Please contact me if you have any questions.

Sincerely,  
WESTWOOD PROFESSIONAL SERVICES

Mitchell Ott  
Solar Project Manager
