⚠ **CAUTION:** This email originated from an external sender. Verify the source before opening links or attachments. ⚠

Adam,

I just wanted to reach out and touch base regarding Sam’s reply to you and see if you had any questions for me. Please note that if you have “waters of the U.S.” that will be excluded, this can only be done with an AJD and not on a PJD.

Feel free to contact me if you have anything you would like to discuss.

Thank you,

Ms. Tre Barron
U.S. Army Corps of Engineers

Subject: RE: Posey Solar Project Request for Comments

Dear Mr. Holven,

I am in receipt of your request for comments on behalf of Posey Solar LLC. Based on the information submitted by you, it does appear that there are “waters of the U.S.” within your proposed project boundary. Depending on how your project is carried out, a Department of the Army permit may be needed if the project referenced above would involve a discharge of dredged and/or fill material below the Ordinary High Water elevation of any "waters of the United States (U.S.)" or any wetlands. "Waters of the U.S." include all waters which are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce. Multiple streams and potential wetlands appear to be present on the site.

The next step in ensuring the appropriate permits are obtained is to provide to us with a thorough delineation of all “waters of the U.S.” located within the proposed boundaries. The delineation must be conducted IAW the Corps’ 1987 Wetlands Delineation Manual and should include all streams, open waters, and wetlands. A Jurisdictional Determination (preliminary or approved) Form should then be completed with the information obtained from the fieldwork and submitted to this office to verify the presence of the delineated waters.

If the project would necessitate the discharge of dredged or fill material into "waters of the U.S.," including wetlands, an application and complete plans should then be submitted for our review.

Our comments on this project are limited to only those effects which may fall within our area of jurisdiction and thus does not obviate the need to obtain other permits from State or local agencies. Lack of comments on other environmental aspects should not be construed as either concurrence or nonconcurrence with stated environmental effects.

If we can be of any further assistance, please contact the Newburgh Regulatory Office at 6855 State Road 66, Newburgh, IN 47630-9794, ATTN: CELRL-RDS or contact Ms. Tre Barron at 812 853-9713 or tre.m.barron@usace.army.mil. Any correspondence on this matter should refer to our ID Number LRL-2021-255.
